INFOSOUL LABORATORIES · SALEM, MASSACHUSETTS · BOOKING SHEET

The AI Age, for the layman.

What is happening, what it means, how to use it, and what is worth arguing about

One talk, for people who are not engineers. A plain-language orientation to the age we are already in, in five parts: where these machines came from, how they work, the questions they put to us, who owns them, and how to use them well. Then one thing to do: run your own. From somebody who builds these systems for a living and is not selling you one from the stage.

> *"Everyone meets these machines at the same door, the engineer and the grandmother alike, and on the other side is something nobody fully understands and anyone can use. An enigma and an invitation."* *From the book behind the talk*

WHAT THE ROOM GETS

- **Where it came from.** Seventy years, two winters, and why it arrived all at once.
- **What it is.** In plain speech, no maths, and what the test scores really mean.
- **The open questions.** Does it think, is anything home, and why nobody has settled it.
- **Three discoveries.** The protein atlas, the enzyme, the claimed proof about flowing water, and who owns what a machine finds.
- **What it gets wrong.** Flattery and invention, watched live, and the one habit that catches them.
- **Fakes.** Cloned voices and video calls, and the rule that still works: check the channel, not the face.
- **Work.** What it is taking, what it makes possible without capital, and why the fight is political.
- **Whose machine.** The money, the data centres, what the owners believe, and the prosthetic you can own.
- **Your own.** A free model running on your own laptop, keeping what you type on your own computer.
- **Everyone leaves** with a one-page plain-language guide.

FORMATS AND FEES

	SESSION	LENGTH AND SIZE	COMMUNITY & CONGREGATIONS	CAMPUS, LIBRARY & PROFESSIONAL
AI 101	The AI Age, For the Layman. The talk.	50 min class slot, or 75 min evening edition. Any room.	$500	$1,500
AI 201	Ask It Yourself. The room puts its own questions to a model and learns to check.	90 min, hands-on. Up to 30 with laptops, 60 in pairs.	$750	$2,000
AI 202	Make It Yourself. Everyone makes something real for the organisation, with free tools.	90 min. Up to 25.	$750	$2,000
AI 301	Run Your Own. An open-source model installed on your own laptop, working when you leave.	Half day. Up to 12.	$1,200	$3,500
AI 401	Give It Hands. Agents in plain words, a read-only agent on your machine, and a written policy.	Half day. Up to 12.	$1,200	$3,500
Series	101 to 301 across a month; 401 when the room is ready. Certificate for every participant; CEU credit through a partner college on request.	Quoted, less for the set.	A room that cannot pay can host it for costs. Say what the budget carries.

WHO IS GIVING IT

Brock Satter, Director of Infosoul Laboratories, an AI consulting and research company in Salem, Massachusetts. He builds and deploys these systems for mission-driven organisations on the client's own infrastructure, with their own data, under their own control.

ON STAGE	Thirty years in front of rooms as a political candidate and community organiser: debates, classes, conferences, rallies and media interviews.
STUDIES	BA student in comparative studies of science, technology and culture at the University of Minnesota: an individually designed major focusing on information technology, biotechnology and artificial intelligence, thirty years before the current wave.
SINCE 1985	Writing rules engines in BASIC on a home computer before the phrase existed.
RECENT WORK	A 711-record public research database across 520 cities, built end to end, with an interactive public map.
THE BOOK	*The AI Age, For the Layman*, the talk written down: seven questions, about 120 illustrated pages, made in conversation with a machine and honest about it. Paperback and ebook, coming soon. A copy for every seat can be added to any booking at cost.

FOR YOUR AUDIENCE

Libraries. An evening talk for patrons, a hands-on session for digital literacy, or a staff training day with a policy conversation added.

Unions and labour educators. What the machine is doing to work, what to put in the contract, and a workshop where members make their own materials on their own machines.

Campuses and lifelong learning. A single lecture, a class slot, or the four-part series as a course.

Congregations. An evening for the whole community, and a workshop for the volunteers who run the office, the newsletter and the notices in two languages.

Community, seniors and civic groups. Plain answers to the questions people are actually asking, and the habit that protects them from fakes and scams.

Conferences. A keynote or a session, in person or online.

WHAT IS NEEDED

ROOM	Seminar room to hall. A screen with HDMI; internet for the workshops; power strips for the hands-on sessions.
ACCESS	All ages. No technical background assumed. Large-print guide on request.
ONLINE	Every session runs on Zoom or the host's platform; hybrid on request. Hosts may record for their members.
PAPERWORK	Invoice on booking, W-9 on request, net 30. Purchase orders welcome.
CANCELLATION	Free to 14 days out; half the fee inside that. Weather and emergencies rescheduled at no charge.
LEAD TIME	Three weeks. Funded series and conference programmes: a semester ahead.
